## Experience

With a strong foundation as a Software Developer specializing in .NET technologies, I bring five months of hands-on experience gained at **VolkSoft Technologies Pvt Ltd**. My time there equipped me with a robust technical skill set, encompassing web development proficiencies in HTML, CSS, JavaScript, Bootstrap, and SQL for efficient database management. I have a deep understanding of server-side technologies, including C#, Java, ASP.NET, and ASP.NET MVC, which allows me to craft dynamic and interactive web applications. I am now eager to contribute my expertise and continue growing in a challenging role that values these skills."

## Academic projects

**Online Student Management System :** An online student registration system is a web-based application that simplifies the process of enrolling students in educational institutions. This system allows students and administrators to complete registration tasks, submit necessary documents, and manage student information.

## Projects

At VolkSoft Company, I had the opportunity to work on a significant project focused on microservices architecture. The project was developed using the MVC (Model-View-Controller) three-tier architecture, which is a robust and scalable approach to building modern web applications.

### Key Highlights:

- Designed and implemented microservices for the project, facilitating modular and independently deployable components.
- Utilized the MVC architecture to separate concerns, resulting in a clean and maintainable codebase.
- Collaborated with a cross-functional team to develop, test, and deploy microservices, ensuring seamless communication and integration between components.
- Leveraged industry best practices to enhance project performance, security, and maintainability.
